Nifty Financial Services Index

Gain broad exposure to firms across the Financial Services sector

December 2020
Introduction

Financial services firms are crucial to the success of the economy in the long run. The financial services landscape in India is constantly changing and evolving. Banks have historically played a critical role in the financial system, channeling surplus funds from savers to borrowers, and continue to do so. However, in recent years other subsectors of the financial services including Insurance, Housing Finance, NBFCs, Asset Management Companies etc. have gained increased prominence. Similar to Banks, Housing Finance companies and NBFCs support credit creation and growth across the economy. Insurance companies facilitate pooling of risks so individuals and firms can focus on their core business, knowing they are financially protected against unforeseen circumstances. Asset Management Companies facilitate savings and investment and help investors achieve their financial goals.

The Nifty Financial Services Index aims to capture this diversity of subsectors within financial services and track their performance in a single index.

About the Nifty Financial Services Index

The Nifty Financial Services Index tracks the performance of Indian financial services companies including banks, housing finance, insurance, NBFCs, other financial services companies etc. The index comprises a maximum of 20 stocks and a stock’s weight is based on its free float market capitalization.

Highlights

- The index has a base date of January 01, 2004, with a base value of 1000
- The index tracks the performance of Indian financial services companies including Banks, Housing Finance, Insurance, NBFCs, other financial services companies etc.
- The companies should form part of Nifty 500 at the time of review to be eligible for inclusion in the index
- The index comprises a maximum of 20 stocks
- The weight of each stock is based on its free float market capitalization
- The index is reconstituted semi-annually
- A buffer based on free float market capitalization is applied to reduce turnover
The Nifty Financial Services Index offers diversified exposure to Banks, Housing Finance, Insurance, NBFCs and other financial companies.

The Nifty Financial Services Index offers broad and diversified exposure to the Financial Services sector. The subsectors and constituents of the Nifty Financial Services Index are shown in Exhibit 1.

Exhibit 1. Constituents of the Nifty Financial Services Index as at December 29, 2020

Source: NSE Indices.
As seen in the Exhibit 2 below, Banks account for 63.1% of weight of the Nifty Financial Services Index, followed by Housing Finance Companies at 18.5%. NBFCs and Insurance Companies have 8.1% and 8.0% weight respectively. Other Financial Services and Financial Institutions categories cumulatively account for 2.4% of the weight of the Nifty Financial Services Index. These categories include Asset Management Companies and Public Sector Undertaking (PSU) lending institutions.

Exhibit 2: Distribution of Nifty Financial Services Index weights by subsector

Investors can obtain greater exposure to various subsectors of the Financial Services sector through the Nifty Financial Services Index compared to Nifty Bank Index and broad market indices

The Nifty Financial Services Index allows investors to get diversified exposure to financial services sector as compared to Nifty Bank Index and more focused exposure as compared to broad market indices. The exhibit below shows the weights of various subsectors of financial services in the Nifty Financial Services Index versus their weights in the Nifty Bank Index and in the broader Nifty 50 Index and Nifty 500 Index.
**Exhibit 3: Distribution of Nifty Financial Services Index weights (%) by subsector compared to Nifty 50 Index, Nifty 500 Index and Nifty Bank Index**

Source: NSE Indices. Data as of December 29, 2020. Other Financial Services includes rating agencies, capital markets, investment companies, stock broking and allied services.

Banks account for 63.1% weight of the Nifty Financial Services Index compared to 26.5% in the Nifty 50 Index, 20.3% in the Nifty 500 Index and 100.0% in the Nifty Bank Index, as of December 29, 2020. Similarly, the weight of Insurance companies in the Nifty Financial Services Index is 8.0% compared to 2.5% in the Nifty 50 Index and Nifty 500 Index and 0.0% in the Nifty Bank Index. Thus, the Nifty Financial Services Index gives investors more targeted and larger exposure to these subsectors of the Financial Services sector than broad market indices. Likewise, Nifty Financial Services Index provides more diversified exposure to various subsectors of financial services sector as compared to exposure to only banking sector in case of Nifty Bank Index.

**The weights of sectors like Insurance and NBFC sub-sector have increased in Nifty Financial Services Index through time**

The weight of the NBFCs has increased from 5.9% as of December 31, 2016 to 8.1% as of December 29, 2020. Through the same period, the weight of Banks has decreased marginally from 67% as of end CY 2016 to 63.1% as of December 29, 2020. Housing Finance companies’ weight has reduced from 23% as of end CY 2016 to 18.5% as of December 29, 2020.
Exhibit 4: Distribution of Nifty Financial Services Index by subsector over the last 5 calendar years

Source: NSE Indices. *Data as of December 29, 2020. For other years, data is as of December 31 for the respective year
The Nifty Financial Services Index has significantly outperformed broader market indices and Nifty Bank over the long term.

Exhibit 5: Nifty Financial Services Index, Nifty 50 Index, Nifty Bank Index and Nifty 500 Index performance

Exhibit 6: Nifty Financial Services Index, Nifty 50 Index, Nifty Bank and Nifty 500 Index performance table

The Nifty Financial Services Index has outperformed both the Nifty 50 Index and Nifty Bank since inception (Jan 01, 2004), with 18.7% CAGR return against 13.9% return for the Nifty 50 Index and 16.9% CAGR return for the Nifty Bank Index. In the last 5 years, over the period of December 31, 2015 to December 29, 2020, the Nifty Financial Services Index returned 17.3% CAGR compared to 13.3% CAGR for the Nifty 50 Index and 13.7% CAGR for the Nifty Bank Index.

Being a sector index, the Nifty Financial Services Index has been more volatile than the Nifty 50 Index, however being more diversified than Nifty Bank Index, it has been less volatile than the Nifty Bank Index over various time horizons. Since inception, the Nifty Financial Services Index has had annualized volatility of 29.3% compared to 22.9% for the Nifty 50 Index and 30.5% for the Nifty Bank Index. Similarly, over the last 1 year between December 31, 2019 and December 29, 2020, the Nifty Financial Services Index has had annualized volatility of 41.2% compared to 31.3% for the Nifty 50 Index and 43.1% for the Nifty Bank Index. This higher volatility over the last year was also due to the pandemic related sell-off in H1 2020, with the economy-sensitive financial sector being significantly affected by pandemic related disruptions. The Nifty Financial Services Index has outperformed the Nifty Bank Index over various time horizons with lesser volatility and better returns and thus exhibited better risk adjusted returns than the Nifty Bank Index.

Source: NSE Indices. Averages and standard deviations calculated using daily rolling returns. Data as of December 29, 2020

From the table above, based on daily rolling returns, for a 1-year investment horizon, the Nifty Financial Services Index has returned an average of 23% p.a. compared to 16.5% p.a. for the Nifty 50 Index. The standard deviation of the time series of 1-year rolling returns, based on daily rolling returns, is 33% for the Nifty Financial Services Index compared to 24.6% for the Nifty 50 Index. Thus, over a 1-year horizon, the rolling return-risk ratio (average rolling return / std. dev. of rolling returns for a given horizon) is 0.70 for the Nifty Financial Services Index vs 0.67 for the Nifty 50 Index.

The Nifty Financial Services Index outperforms the Nifty 50 Index on rolling return-risk ratio basis across longer time horizons as well.
Based on daily rolling returns, for a 7-year investment horizon, the Nifty Financial Services Index has returned an average of 16.9% p.a. compared to 12.0% p.a. for the Nifty 50 Index. The standard deviation of the time series of 7-year rolling returns, based on daily rolling returns, is 4.1% for the Nifty Financial Services Index compared to 3.4% for the Nifty 50 Index. Thus, the rolling return-risk ratio for a 7-year investment horizon is 4.13 for the Nifty Financial Services Index vs 3.54 for the Nifty 50 Index, which demonstrates the Nifty Financial Services Index has provided superior rolling returns adjusted for volatility over 7-year investment horizons compared to the Nifty 50 Index.

Source: NSE Indices. Instances of outperformance or underperformance calculated using daily rolling returns. Data as of December 29, 2020

From the table above, based on daily rolling returns, for a 5-year investment horizon, the Nifty Financial Services Index has outperformed the Nifty Bank Index 75.1% of the time. The frequency of outperformance rises to 82.6% when we consider longer time horizon of 7 years. Outperformance of the Nifty Financial Services Index over the Nifty Bank Index is also observed over shorter periods as well. For example, for 1-year investment horizon, based on daily rolling return analysis, the Index has outperformed the Nifty 50 Index 64.7% of the time. For the 5-year investment horizon, based on daily rolling return analysis, the excess return of the Nifty Financial Services Index exceeds 4% per annum over the Nifty Bank Index in 3.8% of the instances, excess return ranged between 2-4% per annum for 20.1% of the instances and excess return was in the range of 0-2% per annum for 51.2% of the instances, leading to cumulative 75.1% instances of outperformance over the Nifty Bank Index.
From the table above, based on daily rolling returns, for a 1-year investment horizon, the Nifty Financial Services Index has returned an average of 23% p.a. compared to 21% p.a. for the Nifty Bank Index. The standard deviation of the time series of 1-year rolling returns, based on daily rolling returns, is 33% for the Nifty Financial Services Index compared to 33.3% for the Nifty Banks Index. Thus, over a 1-year horizon, the rolling return-risk ratio (average rolling return / std. dev. of rolling returns for a given horizon) is 0.70 for the Nifty Financial Services Index vs 0.63 for the Nifty Bank Index.

The Nifty Financial Services Index outperforms the Nifty Bank Index on rolling return-risk ratio basis across longer time horizons as well. Based on daily rolling returns, for a 10-year investment horizon, the Nifty Financial Services Index has returned an average of 16.9% p.a. compared to 16.0% p.a. for the Nifty Bank Index. The standard deviation of the time series of 10-year rolling returns, based on daily rolling returns, is ~3.9% for both the Nifty Financial Services Index and the Nifty Bank Index. Thus, the rolling return-risk ratio for a 7-year investment horizon is 4.37 for the Nifty Financial Services Index vs 4.06 for the Nifty Bank Index, which demonstrates the Nifty Financial Services Index has provided superior rolling returns adjusted for volatility over 10-year investment horizons compared to the Nifty Bank Index.
The Nifty Financial Services Index tracks the performance of Indian financial services companies including banks, housing finance, insurance, NBFCs, other financial services companies etc.

Presently, with 63.1% exposure to Banks, 18.5% exposure to HFCs, 8.1% exposure to NBFCs and 8.0% exposure to Insurance companies, the Nifty Financial Services Index provides a more diversified exposure to the Indian financial services sector as compared to Nifty Bank Index.

Since inception on January 1, 2004, the Nifty Financial Services Index has returned 18.7% p.a. return vs 13.9% p.a. return of the Nifty 50 Index and 16.9% p.a. return of the Nifty Bank index.

Consistent long-term outperformance of Nifty Financial Services Index vs Nifty 50 and Nifty Bank Index:

The Nifty Financial Services Index has outperformed the Nifty 50 Index over the last 3, 5, 7, 10 and 15 years on a point-to-point CAGR return basis, 100% times on a rolling return basis over 7-year and 10-year periods, and returned 16.9% p.a. on average over 7-year horizons on a rolling return basis compared to 12% p.a. for the Nifty 50 Index.

The Nifty Financial Services Index has outperformed the Nifty Bank Index over the last 1, 3, 5, 7, 10 and 15 years on a point-to-point CAGR return basis, 82.5% times on a rolling return basis over 7-year periods, and returned 16.9% p.a. on average over 7-year horizons on a rolling return basis compared to 16.0% p.a. for the Nifty Bank Index.

The Nifty Financial Services Index is expected to serve as a reference index, which can be tracked by passive funds in the form of Exchange Traded Funds (ETFs), index funds and structured products.
