NSE arm launches SME Index to track firms

INDIA INDEX SERVICES & Products (IISL), an NSE Group entity, has launched a new Nifty Index to measure the performance of small and medium enterprises listed on the dedicated NSE platform for small companies. The Nifty SME Emerge Index reflects the performance of a portfolio of eligible companies listed on the Emerge. The index represents about 62 per cent of the full market capitalisation of all SMEs listed on the Emerge. The launch comes on a day when NSE saw the listing of its 100th SME on Monday. As against this, the rival BSE's similar platform has over 200 companies listed on the exchange.
